P-MI value $V(b)$
continuous baseline $U(b)$
grid secant of V
grid secant beside certified nonconcavity
baseline dual
big-M relaxation dual
perspective relaxation slope
fixed-integer dual
certified secant s with $[L, H]$
2017-12, N = 250, K = 67
2020-03, N = 250, K = 79
P-MI objective (bp/month)
slope of P-MI objective (bp/month per unit b)
bound b on sector (net weight)
bound b on sector (net weight)
